## WHEEL AND TYRE SERVICE

Did you know that the front and rear wheels of your vehicle operate under different conditions and rates?

**FROM \$27.50**

This is why tyres should be rotated every 8,000 kms to even out wear and obtain the best possible life for such an important investment.

Our Ford factory trained technicians will inspect your tyres for uneven wear, damage and tread depth. Before rotating your tyres, we will also check or inflate tyres to the correct pressure. This will help further extend the life of your tyres.

Finally your vehicle will be finished off with a tyre polish, before handing the keys back to you.

**Plus**

**FREE**

**15 POINT SAFETY INSPECTION**
